

To Whom It May Concern:

HB 6645

I wish to make my objections to this HB6645 or compassionate suicide known. This will only assist those without hope to end their lives, instead of offering them a alternative. This Bill will encourage the youth to believe life is cheap and to take the "easy way" out. Don't help despairing folks, the elderly or young to end their lives. Support programs that help them. Initiate hope for them that they may regain self respect and their dignity. We can't afford many needy programs today this Bill will cost and take away from positive programs we already have.

Sincerely,

Eleanor Kaufman
